GELATO INGREDIENTS

BASES FOR ARTISANAL GELATO

The goodness and the yield of a gelato depend on a multitude of factors but one that can never be overlooked is the Base. The bases are the first brick on which a recipe of success must be built, it's their perfect balance of fats, sugars and proteins that allows you to obtain a well-structured gelato at the service of your ideas: airy and emulsified, with a homogeneous consistency, perfect stability in the showcase, and easy to scoop.

Ingredients studied, combined and balanced with over 30 years of experience to give the master gelato chefs all the necessary support to do their job better and quicker, enhancing their skills and leaving the creativity of the artisan unchanged. The MEC3 Bases are the reference point in the world of gelato thanks to the vast range of solutions capable of satisfying the needs of all the gelato makers and thanks to the continuous evolution always capable of guaranteeing simply perfect gelato.

FRUIT PUREE

Why add anything other than fruit to our frozen purees?

Our know-how and that of our partners allow us to easily offer natural frozen fruit purees, without preservatives, thickeners, colourings... and now without added sugars! Are they pasteurized? No, for the vast majority! Some, because fruits naturally contain bacteria, harmful to health, or because they oxidize, are. But the temperature and heating time are specific to each fruit, depending on what we want to destroy.

FRUIT JUICE

FROZEN FRUIT JUICES

Simone Gatto frozen citrus juices are irreplaceable allies of the ice cream maker, because they are of the highest quality. The fruits are grown in Sicily and Calabria and carefully selected, and are part of a short, traceable and controlled supply chain. The juices are 100% pure and natural, as they are composed of only Fruit.

Our single-strength juices are made from citrus – fruits grown by expert farmers through natural methods, ripen under the Calabrian and Sicilian sunshine, picked up with care by hand, so as kept in the best possible condition, before deliver to our premises.

Once received in our factory, citrus fruits are processed, squeezed both with traditional extractors that use reamers to get the juice (like home squeezing methods) and high yield American Extractors.

The process ends up with juice stabilisation and packaging that can vary according to the market of final destination.
